

We work to understand each customer's specific needs and help them to achieve their goals.

An Exceptionally Versatile Company

Located in central Vermont, Kalow's facility gives you access to several important features: people, location and experience. With access to resources and a highly skilled workforce, we can control costs and ensure quality to give you a competitive edge. Within a few hundred miles there are 80 million people — customers, suppliers and vendors — along with access to ports and other facilities to get your product where it needs to be.

With a modern, adaptable facility, a skilled engineering team and a flexible team of multifaceted builders, we can manufacture a wide range of products; as well as take new innovations from beta stage to delivery. Together with our world class metal fabrication shop and powder coat facility, Kalow Technologies defines vertically- integrated contract manufacturing.

KALOW can:

- Increase your capacity
- Reduce your manufacturing footprint
- Reduce manufacturing expenses
- Reduce costs for certified quality systems and process implementation
- Increase your operational efficiency and flexibility

Committed to providing innovative engineering and manufacturing solutions.

- Assembly / Manufacturing Services
- Engineering Support
- Design for Manufacturing
- Sheet Metal Fabrication
- Powder Coating
- Part Sourcing and Procurement
- Quality Control Testing
- Shipping Logistics
- Spare Parts Fulfillment
- Machine & Product Refurbishment

OUR EXPERIENCE

Kalow Technologies was founded in 1983 by a group of highly talented engineers, and the business has grown steadily ever since. Through the years, we've had the pleasure of working with some very exciting startups, as well as Fortune 500 companies, and everything in between. From 3D printers, conveyer systems, and robotic welders; to tactical military, mobile farming and medical projects; we do it all and we do it to the highest standards.

- Experienced in a wide array of industries
- Full-service product support
- Skilled procurement team
- In-depth familiarity with global QC standards
- Proficient in international & domestic shipments

ENGINEERING SERVICES

Our engineering department is made up of mechanical, electrical and manufacturing experts who are committed to meeting our customers varying needs. We're problem solvers from design development, to prototyping, to production and final testing. Our mission is to get your product ready to build in a cost-effective and time-efficient process.

- Cross-disciplined engineers and technicians
- Mechanical, electrical, hydraulic, pneumatic, optical, and other control type systems
- 3-D CAD and Solidworks capabilities
- Design familiarity with UL, CSA, CE, TUV, NSF, and IAPMO certification requirements

CONTRACT MANUFACTURING

Kalow offers full-service, electro-mechanical contract manufacturing, and more. We function as a true extension of your company with everything you need to get your products to market. From design-for-build, production and testing, to logistics and distribution – our team is your team.

- Electromechanical machine & system builds
- Electromechanical, hydraulic, and pneumatic control system integration
- Electrical panel and control box assemblies
- Value-added kitting services
- Cable assemblies and harnesses
- Cutting edge sheet metal fabrication
- Spare parts, field service and refurbishing
- Modern, adaptable facility

OUR PEOPLE

It's a leap of faith for a company, big or small, to entrust the manufacturing of an important product to a new partner. We know what it takes to earn that trust, and that's reflected in how our team approaches every build, every challenge, every relationship. We never take that trust for granted.

- 35+ years of electro-mechanical contract manufacturing history
- Deep knowledge of and experience in a wide array of industries and certification systems
- Talented Materials Management team versed in MRP/JIT planning and procurement
- Confident and results-oriented Engineering team specializing in practical solutions
